PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, LNCT Bhopal, June 2026) with a strong foundation in Data Structures, Algorithms, OOP, DBMS, and the SDLC, backed by hands-on full-stack development across Python, SQL, Flask, and JavaScript/REST APIs. Comfortable solving problems ranging from easy to hard difficulty and translating them into optimized, production-quality code; has independently designed, debugged, and performance-tuned three end-to-end applications. Certified by Salesforce, AWS, and Cisco.

TECHNICAL SKILLS

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Software Design Principles, REST APIs, SDLC
Languages: Python, SQL, JavaScript, HTML/CSS
Frameworks & Libraries: Flask, MySQL, NLP (rule-based)
Tools & Platforms: Git, GitHub, Tableau, Excel, Salesforce
Other: Software Maintenance & Optimization, Data Analytics, ML Foundations, Generative AI, UI/UX Principles

PROJECTS

- Audex – Natural Language Interface for SQL Querying** | *Python, Flask, MySQL, NLP, Regex* May - June, 2026
- Designed, developed, and optimized a Flask application converting plain-English queries into valid SQL using rule-based NLP and regex-based parsing algorithms, reducing manual query effort for non-technical users.
 - Applied core software design principles (modular architecture, separation of concerns) to build a maintainable codebase spanning parsing logic, REST API layer, and MySQL backend – exercising independent system design.
- Voice-to-Voice Language Translator** | *Python, Speech Processing, Web APIs* Aug - Nov, 2025
- Solved a real-time speech processing problem by architecting and integrating STT and TTS pipelines, achieving sub-second multilingual translation through iterative algorithmic and performance optimization.
- Web-Screen Recorder** | *JavaScript, HTML, Browser Extension APIs* Sept - Oct, 2024
- Developed and optimized a cross-browser extension for screen/tab/window capture, maintaining under 2% CPU overhead – a measurable performance target met through iterative profiling, testing, and code refinement.

EXPERIENCE

- Salesforce Developer Intern** 05/2025 – 07/2025
Smartbridge × Salesforce Remote
- Completed an 8-week structured internship covering Developer Fundamentals, Process Automation, Data Management, Security Management, and Lightning Web Components, building software engineering discipline and problem-solving rigor.
 - Managed own time across parallel Trailhead tracks, consistently delivering accurate assessments on schedule with reducing supervision – demonstrating self-organization and reliable, independent output.
- Data Analytics Job Simulation** 12/2025
Deloitte Australia – Forage Remote
- Collaborated on a simulated client engagement to design and build interactive Tableau dashboards, translating complex datasets into actionable business insights.

EDUCATION

Lakshmi Narain College of Technology (LNCT) Bhopal, India
Bachelor of Technology in Computer Science and Engineering – CGPA: 7.55/10 2022 – 2026

CERTIFICATIONS & ACHIEVEMENTS

- Salesforce Developer – Agentblazer Champion – Salesforce
- AWS Academy Cloud Foundations – AWS Academy Graduate
- Introduction to Data Science & Cybersecurity – Cisco Networking Academy
- Generative AI – Skillible
- Data Analytics Job Simulation – Deloitte Australia (Forage)
